Printer Install Instructions: MacOS - Canon\Kyocera Printers

- 1. First step (download driver) google search Cannon or Kyocera model (i.e canon 5560, KY5003 driver) Watch the How-To Video to see what driver should work for you.
- 2. Retrieve printer name from the physical printer. It can be found on a label in this format: Ex. CLS_WIL205_CN7270.msu.montana.edu

3. Click on the Apple logo on the top left corner of the screen, select "System Settings"

5. Click on the "Add Printer"

- 6. Select the IP (globe icon) tab.
- 7. Input the printer's name in the Address line.
- 8. Select "HP Jetdirect Socket" for Protocol (This step is for HP, Canon & Kyocera printers)
- 9. Under Use, click on the drop down and select "Select Software"
- 10. A new window will open, search for your model (ex. 7270 or 5003) and select the driver result. (Typically, the first option) Click "Add" to add the printer.

If you department requires a pin for printing, take these next steps. Go to Options & Supplies. At the next pop-up select "Utility", "Open Printer Utility" then under User Management select Department ID Management.
